Re: Centron Diesel Fuel Saver and Centron Gasoline Fuel Saer classified as Combustable liquids  
not flammable liquids.

Both of these products have a flash point of greater than 100F and less than 140F at approximately 106F. Under the Transportation 49CFR 173.120 (a) (2) a material at or above 100 F may be reclassified as combustable liquid.

Under the NFPA Fire Codes section 704 a combustable liquid-class II is defined as flash point 100F to 140F.
