To Whom It May Concern:

**RE: CENTRON DIESEL ADDITIVE SHELF LIFE**

This letter serves to confirm that Centron Diesel Additive should have a shelf life of 5 (five) years, provided that it is stored in its original, unopened containers and these containers have been stored in a cool, dry environment out of direct sunlight.

The integrity of the product with respect to appearance, odour, clarity, colour and performance should not have been at all compromised if the above conditions have been met.

Yours Sincerely,

DON MACKAY BSc, BCom, Pr.Sci.Nat
