Centron Fuel Supplements
128 11th ST South
La Crosse, WI 54601

We wanted to thank you for introducing us to the Centron Fuel Supplements. La Crosse County Highway Department has a long term comprehensive sustainable plan which shows how committed we are to the overall health of our environment and our community for today and all future generations.

Emissions Evaluation:

Our initial emission evaluation was on two of our dump/plow trucks which run ULSD fuel with a 5% Bio-Diesel blend in the warmer months. From our initial evaluation and outside research from credible third party organizations, we found that Centron not only helps decrease emission output, but was also able to restore lost efficiency and increase fuel economy enough to pay for the product with a possible return on the county's tax dollar.

Currently we are using the Centron Fuel Supplements in both our Gasoline and Diesel bulk storage tanks. The overall evaluation of our emissions will be done by testing a portion of our fleet using an EPA approved Kent Moore 5-Gas Analyzer. We have found that the Centron Fuel Supplement helped decrease our exhaust emission output by the following amounts;

NOx -23.38% **HC - 40.50%** **CO - 20.72%** **CO2 - 10.03%** Emission
outputs will continue to be monitored each quarter to show that the product is continuing to reduce our entire fleet's emissions.

Efficiency Evaluation:

When we started the program, we knew from prior customer's referrals and mileage data that we would at least achieve a paid back return on investment on the cost of Centron. But after looking at some of our 2007 tri-axle trucks, we noticed a 0.5 mpg improvement which represents an 8% savings in fuel, which is over double the mpg gain needed to pay for the product. We are pleased to see that Centron lived up to its claims and represents a cost savings in fuel expenditures for our budget.

Summary:

Overall, the Centron product has helped our organization reduce our carbon footprint with a return on investment. We are very pleased with the level of service we have received and this program has fit well into our comprehensive plan. Again, thank you for introducing us to Centron Fuel Supplements.

Regards,
